## Announcing the Release of the RICOH THETA Stick TM-2 and RICOH THETA Stick TM-3 Selfie Sticks for Use with the RICOH THETA

TM-2

TM-3

We would like to announce the release of the RICOH THETA Stick TM-2 and RICOH THETA Stick TM-3 selfie sticks specially designed for use with the RICOH THETA series.

[Summary of release]

- ◆ Product name: RICOH THETA Stick TM-2  
RICOH THETA Stick TM-3
- ◆ Compatible models: All RICOH THETA series models

[Shared features]

- Distancing the user's hands from the THETA body allows the user to take 360° images without their fingers interfering with the shot
- Utilizes a lock mechanism developed by Velbon Corporation, allowing the THETA to be used in a stable state even when the stick is at full extension, despite its slim configuration
- Easy-to-hold rubber type grip with matte black color

[Features of the RICOH THETA Stick TM-2]

- 5-section type that extends to a maximum of approximately 83 cm, allowing shooting in a wide variety of photographic scenes such as when traveling or at events, or when shooting scenery
-

- Specially designed tilt camera platform ensures that the camera platform itself does not appear in the shot

[Features of the RICOH THETA Stick TM-3]

- 3-section type that extends to approximately 42 cm when fully extended and approximately 18 cm when folded up, with a compact form that weighs approximately 80 g
- Camera platform that attaches directly to the camera, and compact enough that does not appear in the shot
